## **COPYRIGHT STATEMENT**

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials including foreign works under certain conditions. In addition, the United States extends protection to foreign works by means of various international conventions, bilateral agreements, and proclamations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

The Columbia University Libraries reserve the right to refuse to accept a copying order if, in its judgement, fulfillment of the order would involve violation of the copyright law.

## STATISTICAL SUMMARY OF EMERGENCY RELIEF ACTIVITIES

January 1933 Through December 1935

Revised data on emergency relief activities conducted by State and local relief administrations with Federal, State, and local public funds are presented here with for the period January 1933 through December 1935. The figures are based on reports submitted by the State Emergency Relief Administrations to the Federal Emergency Relief Administration.

Activities conducted under the Civil Works Program and the Federal Works Program are not included in the accompanying tables and it will be noted that the emergency relief totals show large declines during the periods in which these programs were in operation. Other types of aid not included may be summarized as follows: categorical assistance, such as public aid extended as old-age assistance, aid to the blind, and aid to dependent children under the provisions of the Federal Social Security Act, and assistance of these and similar types extended under special legislation; institutional care and the issuance of Federal surplus commodities and commodities produced under Works Program and work relief projects. However, cases which during a given month received relief in addition to one or more types of aid specified above are included in the data, together with the amount of relief issued.

The figures do not include a relatively small amount of relief extended from local funds in accordance with the provisions of the poor laws. This unreported aid was usually administered to unemployable persons by certain county commissioners or by township trustees or other local authorities who were not associated with the emergency relief program. With the assignment of former relief cases to the Works Program and the depletion of balances of funds granted by the Federal Emergency Relief Administration in the closing months of 1935 and the opening months of 1936, this unreported relief increased in relative importance in many localities. The depletion of

Federal funds was also followed by extensive reorganization of relief activities in many States, which in some instances made it difficult or impossible to identify emergency relief as distinguished from other forms of non-institutional, non-categorical public assistance. In order to maintain a comprehensive series, an attempt was made to expand the scope of the data collected by the Federal Emergency Relief Administration to include all relief given in accordance with the poor laws, exclusive of institutional care and categorical aid. This change was effective beginning with data for January 1936, the figures being published under the heading "general relief" rather than "emergency relief extended under the general relief program." The change in definition made the data for 1936 not strictly comparable with the data collected for 1933-35.

In the accompanying tables separate data are shown for emergency relief activities conducted under the general relief program, and for four special programs, namely the emergency education, college student aid, rural rehabilitation, and transient programs. The general relief program includes, in addition to direct relief, work relief which prior to April 1934 was extended by local relief administrations largely at their own discretion and with a minimum of supervision by the FERA in regard to wages, hours, or types of projects. After the cessation of the Civil Works Program in the spring of 1934, the FERA inaugurated the emergency work relief program, under which a work division was organized in each State and local Emergency Relief Administration to operate in accordance with Federal policies. Data concerning costs of non-relief labor and materials, supplies, and equipment were not reported until April 1934 when the emergency work relief program was initiated. These items are shown separately in Table 3. Other costs attributable to the emergency work relief program such as rental of equipment and

team and truck hire are included in the "all other" column of this table. During each month some general relief cases received both direct relief and work relief earnings. In tables presenting case data such cases have been included as work relief and not as direct relief cases. Amounts of direct relief extended to these cases, however, have been included as direct relief. The figures for the general relief program include relief extended in connection with the drought and cattle activities of the Emergency Relief Administrations.

Persons employed on the college student aid and emergency education programs have been tabulated as single persons. The college student aid program was terminated at the end of the academic year 1934-35, after which the National Youth Administration conducted similar activities. The emergency education program was gradually curtailed during the closing months of 1935, many of the teachers being assigned to similar projects operated under the WPA program. Since the rural rehabilitation program was transferred to the Resettlement Administration, effective July 1, 1935, no data are shown for this program for months subsequent to June. The recipient data for the transient program represent the number of transient persons under care on a single day of each month as determined by a mid-monthly census. This program was curtailed during the last few months of 1935, many transients formerly cared for by Emergency Relief Administrations being assigned to Works Program projects.

The recipient data for general relief and special programs other than transient relief represent the number of different persons and cases receiving relief at some time during the calendar month. The term "case" is used in these tables to denote a family or single person. The total number of cases is thus equivalent to the total number of families plus the total number of single persons. All data pertaining to resident cases exclude cases cared for as tran-

sients under the transient program but include local homeless cases.

The instructions for preparing relief reports provided that all amounts be reported on the basis of obligations incurred. This basis was used rather than expenditures in order that a measure of the amount of relief actually extended to cases during a month might be obtained. The amount of obligations incurred for direct relief extended to cases during a given month includes the amount of relief orders or requisitions issued to the cases during the calendar month, regardless of the dates on which actual payment for the goods is made by the relief agency. The amount of obligations incurred for work relief extended to cases during a given month represents the amount earned during the payroll periods ending within the month. The amount of obligations incurred for relief extended to cases differs from the total amount of obligations incurred for emergency relief in that the latter includes such items as the cost of non-relief labor, materials, supplies, and equipment, and administration.

#### Data Estimated for Early Months

Although total amounts of obligations incurred by sources of funds were reported by each State for each month of this period, many States were unable to furnish separate data on amounts of relief extended as work relief and as direct relief during the first few months of 1933. For this early period only a small number of the States reported complete information relating to the number of relief recipients. In order to increase the usefulness of the figures which were reported, estimated totals for the Continental United States have been prepared. The estimates for April, May, and June, 1933, are more reliable than those for January, February, and March; and the estimates for single persons and for work and direct relief are subject to more serious limitations than the estimates for total families and total cases.
